SUMMARY

Innovative software developer with exceling in python and MySQL to optimize database management Adept at front-end development and collaborative problem solving. Driving a 30% increase in application efficiency through creative solutions and effective teamwork

Batchlor of Engineering

D.V.R & Dr H.S MIC COLLEGE OF THECNOLOGY
Kanchikacherla 08/2023-04/2027

Intermediate – MPC

SGS junior College
Jaggiahpet 06/2021-04/2023

SSC

Sri Gowthami High School
Jaggiahpet 03/2017-01/2021

Project

Weather App (API Project):

Built a weather application using JavaScript and a public. API Fetched real-time weather data based on user input location. Displayed temperature, humidity, and weather conditions dynamically. Practiced API integration and asynchronous programming

E-Commerce Platform :

Built a scalable e-commerce platform with dynamic product management

Implemented secure payment gateway integration

Designed RESTful APIs for order and cart operation

Technical Skills

Python
Flutter
Front-end development

Certifications

Internet of things- NPTEL
Python fullstack- Eduskills
HTML/CSS- Infosys springboard

Additional information

Strong analytical and logical thinking skills with the ability to break down complex problems into manageable solutions
